Success Story

Shatrabhuj Farmer Producer Company Limited

Namaste, My name is Ramji Bhai Patoliya, and my company already operates an FPC in the district of Junagadh's Bhesan area. We have a farmer base of roughly 500-600 farmers, and we had planned to open a new store for pesticides and fungicides when we saw on social media that Upl Limited is running a concept called Unimart (Farm Advisory and Solution Centre), and we received complete information from the Unimart team, On November 20, 2022, we launched the first Unimart as an FPC in Gujarat.

Following our affiliation with Unimart, we provided a variety of services to our farmers, including soil testing, soil analysis, plant analysis, groundnut digger, harvester, and spraying equipment, agronomist services, and crop packages. Due to this concept and crop package, advisory farmers told us that their production grow by 10-15% compared to last year and that their costs decrease. In just 6-7 months, we covered 15 villages and achieved 60 lacks business.

Financial difficulties are yet another major source of pain for farmers, but thanks to Unimart, we now offer farmer financing at a low rate of interest. It's like giving farmers a blessing.

I want to express my gratitude to the Unimart team for developing one-stop solutions for farmers.
